Web Based Training: CTU Code / CoP

Version 8-2016

In countries committed to the CTU Code (e.g. EU countries plus Switzerland), personnel who are directing and conducting any loading or unloading processes in transport units need to be trained accordingly. The content of this ARCADEMY e-learning is according to the specifications in the CTU code and offers an industry independent knowledge base – clear, interactive, and practical.

Description

The e-learning is geared to the contents of the CTU code. Roles (e.g. shipper, consignor, etc.) and associated legal responsibilities are explained in a simple and comprehensive way by means of animation and graphics. Practical advices and interactive exercises deepen the knowledge gained and put it into relation to work practice. The training covers the following topics:

- Responsibility for loading
- Legal requirements for the responsible persons
- Rules for packing and storage
- Forces in road, rail, or sea transport
- Calculation of securing forces
- Measures using various devices for load securing
- Documentation of the load securing
- Instructions for the consignor
- Training contents for a hands-on training

Length

60 min.

Target group

Enterprises and their employees, who dispatch, load, transport, receive goods, i.e.

- Shipping staff
- Shipping manager
- Dispatchers
- Storage staff in port
- Unloading staff
- Responsible persons

Highlights

- Many exemplary pictures to the state of a CTU
- Calculator for determination of the number of straps for load securing
- Calculator to determine if load is secured sufficiently
- Practical advices for CTU unloading
- Many interactive exercises
- Final test and certificate

Language

German, English

CTU-Code as a turnkey training

You only need to place the order for a course licence. You will receive access details which you will have to forward to the learner. We take care of the rest:

- You can access the training day and night
- The training is up-to-date at all times - both content- and technology-wise

Price:

- 38 € per person
- More than 25 persons: discount of 10%
- More than 50 persons: discount of 15%
- More than 100 persons: discount of 20%

CTU-Code as a tailor-made course

The ARCADEMY course will be turned into your corporate training. This way you save an extensive new production and profit from all the advantages of an individual solution.

We customize based on the existing courses:

- Integration of your contents
- Layout of the course using your corporate design
- Provision of an interface to your learning management system
- Preparation of new language versions

Price:

- Upon request
- Depending on the adjustments inquired

Potential applications

- As e-learning
- Combined, e.g. for preparation of an (shortened) on-site training
- As reference guide

Additional offering

- We accompany e-learning projects of all types, from consulting, conception, associated communication up to performance review.
- You need an e-learning from scratch or an explanatory video on a different topic? Look no further: we design a tailor-made solution that meets your training needs.

What our clients say!

„E-learning provides the opportunity to enterprises of five up to 100'000 employees to impart transport safety knowledge in a sustainable and legally reliable way. The courses of ARCADEMY are in terms of content and technically state-of-the-art, lively, and provide valuable hints for the practice.“

Raul Mitter, Euro-Cert safety expert for Dangerous Goods Transportation and Cargo Securing by Road, Rail, Air & Sea; Basel Switzerland
